

NOW ACCEPTING APPLICATIONS

CTA HEALTH

SAN FRANCISCO SEPT - DEC 2020

HOW IT WORKS

The Canadian Technology Accelerator (CTA) for Health in San Francisco provides high potential Canadian companies with curated access to one of the most important clusters of life sciences innovation in addition to the venture capital ecosystem and global technology hub of Silicon Valley.

At its core, CTA Health takes a customized approach to support entrepreneurs and their commercialization goals in California and the U.S. Each CTA Health company is matched with an advisory team of up to five local executives tailored to their specific business needs such as negotiating strategy, accessing venture capital, cross-border corporate structure, regulatory plans, pilots, partnerships and reimbursement pathways.

In response to COVID-19, the CTA Health program will be run virtually this year including all advisory meetings, masterclasses, and opening and closing events. The closing showcase will be re-evaluated on a continual basis as opportunities to visit the Bay Area and meet in person become possible.

WHO SHOULD APPLY

CTA Health is open to growth-stage companies from across Canada:

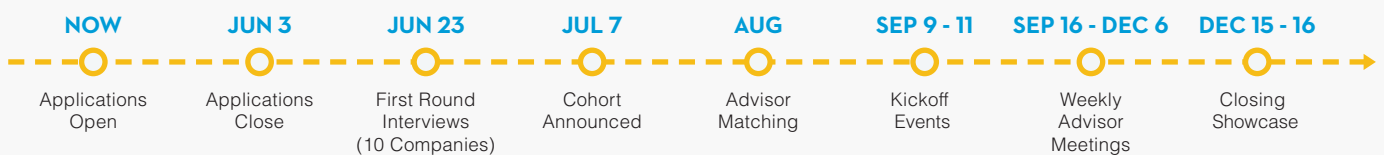

- With a minimum proof of concept and clear strategy for accessing the Bay Area market
- Seeking venture capital [post-seed – series A] or alternative financing, partnerships, and customers within the next twelve months
- With a CEO or founder committed and able to participate in virtual advisory meetings and preparatory work, as well as in all virtual kickoff and closing programming.
