The AI Opportunity: Revolutionizing Clinical Trials, Transforming Health Care

Special event at 2025 BIO International Convention

Clinical Trials Ontario, Life Sciences Ontario, and OBIO are bringing industry and research leaders together for an event showcasing how artificial intelligence is transforming clinical trials and healthcare delivery.

The in-person event, taking place on **Monday, June 16, 2025**, at the **Westin Boston Seaport District** will provide insights and explore how artificial intelligence is reshaping clinical trials and the broader healthcare landscape.

- The impact of AI on clinical trials and data integration
- Ontario and Canada's advantages in conducting AI-driven research and innovation
- Opportunities to enhance patient care and accelerate therapeutic development

This event is designed for leaders in the pharmaceutical and medical device industries, CROs, and business and healthcare innovation professionals with a focus on Canada. This networking opportunity highlights the strength of Canada's research ecosystem and its role in advancing the future of global healthcare.

AGENDA

- 7:45 AM** Registration, Breakfast and Networking
